Mohamed Salah Hamdi is currently an Associate Professor at Ahmed Bin Mohammed Military College (Qatar).

He earned a "Diplom-Informatiker" (Bachelor + Master) Degree in Computer Science from the Technical University of Munich (Germany) in 1993 and a Ph.D. Degree in Computer Science from the University of Hamburg (Germany) in 1999.

He has previously worked at the Technical University of Munich (Germany), at the University of the Bundeswehr in Munich (Germany), at the University of Hamburg (Germany), at the University of Carthage (Tunisia), at the UAE University (United Arab Emirates), and at Qatar University (Qatar). He joined Ahmed Bin Mohammed Military College (Qatar) in 2008.

His research interests are focused on the areas of theorem proving, intelligent autonomous agents, e-learning, information customization, effects of ICT on the society, software engineering, neural networks, machine learning, and on artificial intelligence in general.

He received funding for many research projects and has published a large number of papers in conferences, books, and journals. He has also served as program-committee member in several conferences and journals.
